TRAINING OF TRAINERS

Module	Objectives	Content	Method/Tools	Activities	Resources	Time	Preparation
Module 1	Understand the importance of training and the role of the trainer.	Introduction to training, the role of the trainer, and the importance of training.	Classroom, self-study, and group work.	Role-play, case studies, and group discussions.	Handouts, audio-visual aids, and training materials.	45 min	PC 11
Module 2	Identify the needs of the organization and the learners.	Needs analysis, learning objectives, and the importance of training.	Classroom, self-study, and group work.	Role-play, case studies, and group discussions.	Handouts, audio-visual aids, and training materials.	45 min	PC 12
Module 3	Design and develop training materials.	Instructional design, content development, and the importance of training.	Classroom, self-study, and group work.	Role-play, case studies, and group discussions.	Handouts, audio-visual aids, and training materials.	45 min	PC 13
Module 4	Deliver training and evaluate the effectiveness of the training.	Delivery techniques, assessment, and the importance of training.	Classroom, self-study, and group work.	Role-play, case studies, and group discussions.	Handouts, audio-visual aids, and training materials.	45 min	PC 14

MODULES

<p>Module A: Social aspects of education loans and customer protection principles</p> <p>This module will build the bridge between the following three issues related to EduFinance: Importance and structure of education in general; Financing of education (problems and solutions), impact of education loans and indicators/objectives for the future, as well as the importance of knowing your customer well (family background, financial background, level of financial education, needs, education preferences, ...) to avoid over-indebtedness of clients.</p>	<p>Module F: Risk management: Evaluation of school fee loans</p> <p>This module will start with a reminder of general appraisal concepts of micro loans which are the basis for school fee loans. Furthermore, it covers the specific requirements for appraising school fee loans. This includes documentation required to analyse the requested amount, the existence and accreditation of a school, the existence of a child, as well as the business which will be at the basis of repayment. The module will cover evaluation and appraisal of school fee loans. This includes calculation of repayment capacity of the borrower based on the cash flows generated by the business which will cover the repayments. It also includes the calculation of the needed loan amount (including for example tuition fee, examination fees, books and other related costs).</p>
<p>Module B: Get to know the product and the client</p> <p>This module will cover the specifics of the participants' institution's range of products on Edufinance, the marketing material and the target groups for the range of products. Participants will also be made familiar with the clients' needs and alternative financing options and how to identify existing as well as new clients for EduFinance products.</p>	<p>Module G: Risk management: Evaluation of school improvement loans</p> <p>This module will cover the specific requirements for EduFinance school improvement loans. This includes requirements in terms of documents required to corroborate the requested amount, the existence and accreditation of a school, etc. It will help staff understand where and how the customer can obtain and verify these documents. The training will also cover evaluation and appraisal of school improvement loans. This includes the elaboration of historical and projected monthly cash flows as a basis for the calculation of repayment capacity of the borrower. It also includes the calculation of the needed loan amount.</p>
<p>Module C: Develop strategies to approach the client</p> <p>This module will cover specific techniques and technical knowledge on sales of Edufinance products. This includes the definition of different target groups; client segments understanding of clients' needs and alternative financing options; points of contact to attract new clients (school meetings, village meetings etc.); how to approach existing clients; how to analyse current client portfolio to identify potential clients for education loans, etc.</p>	<p>Module H: Risk management: Monitoring and delinquency management of school fee and school improvement loans</p> <p>This module will build on general monitoring procedures for micro and SME loans within the institution. This includes the monitoring of repayment sources (i.e. the customer's business) as well as other specific risk factors identified for school fee and school improvement loans that have been identified as early warning indicators for repayment challenges (school quality, student drop-out, etc.). This module will also build on the institution's general delinquency management techniques and procedure for micro and SME loans. Specific issues and differences regarding delinquency in school fee and school improvement loans will be discussed.</p>
<p>Module D: 101 on communication and customer service</p> <p>This module will cover general communication skills required for successful client interaction. A focus will be set on education loans wherever necessary (Presentation & communication skills; negotiation & selling techniques).</p>	<p>Module I: Risk management: Managing education portfolio risk</p> <p>This module is targeted at middle and higher management within institutions. It covers the essentials of school fee and school improvement loan evaluation, monitoring and delinquency management. It provides a reminder on the institution's credit committee guidelines and procedures and covers specific risk factors to look out for when approving education loans in credit committees. Finally, it touches upon risks associated with portfolio concentration and refreshes participants' knowledge about concentration limits, as well as loan concentration monitoring and management.</p>
